EXPERIENCE

Austin Coding Academy, Austin, TX — CTO + Lead Instructor

AUG 2015 - PRESENT

<https://austincodingacademy.com>

In charge of all things technical, authored curriculums, and taught web development courses to adult learners.

- Responsible for entire company software infrastructure
- Created, maintained, and led interns and contributors on Campus Manager, our custom Learning Management System
- Authored curriculums on HTML, CSS, JavaScript, React.js, Node.js, Express.js, MongoDB
- Developed workbooks with CI integration for linting
- Built reporting infrastructure that combined data from multiple sources: Payments, CRM, LMS, etc.
- Implemented automation for web hooks, status checks, user events, reports, deployments, tests, etc.
- Implementing/analyzing tracking services such as Google Analytics/Tag Manager, Facebook Pixel, click heatmaps, etc
- SEO Optimization

Continuum Analytics, Austin, TX — Software Engineer

JUNE 2015 - JAN 2017

<https://continuum.io>

Bokeh contributor, an open-source python driven graph generator. Implemented and designed client-specific projects and solutions.

- Worked on <https://anaconda.org>, a packaging and environment manager repository
- Contributed to open-source packages such as Bokeh
<https://bokeh.pydata.org>
- Fast-paced full-stack client-specific projects with modern web development stacks
- Introduced and implemented Continuous Integration practices

Generation Ready, Austin, TX — Lead Software Engineer + Architect

NOV 2013 - JUNE 2015

<https://generationready.com>

Designed, built, and maintained in-house internet software. Headed

A life-learner and new technology nerd, I work hard at the things I love: programming, teaching, and learning.
