https://linkedin.com/in/kevincolten

https://github.com/kevincolten

SKILLS

Product Management

- Manage development team
- Maintain budgets
- Write out descriptive requirements
- Hire new technology role positions
- Train new technology hires
- Manage DNS and productivity software
- Organize product assets

Sales Ops

- Build out and maintain CRM
- Automate workflows and movement of data
- Develop integrations
- Map out sales pipelines

Marketing Technology

- Install marketing solutions
- Measure engagement and advertising
- Web development

Cybersecurity

- Ensure compliance in technical and business architecture
- Enforce authentication and authorization policies
- Treat sensitive data as a liability rather than an asset

Business Intelligence

- Map ETL pipelines to gather data from different services

Austin Coding Academy — *Chief Technology Officer + Senior Software Engineer + Lead Instructor*

AUG 2015 - Aug 2019 **ACQUIRED 2019 by Zollege**

https://austincodingacademy.com

In charge of all things technical, authored curriculums, and taught web development courses to adult learners.

- Responsible for entire company software infrastructure
- Created, maintained, and led interns and contributors on Campus Manager, our custom Learning Management System built with Node.js/Express.js/MongoDB/React.js/Backbone.js
- Authored curriculums on HTML, CSS, JavaScript, Backbone.js, React.js, Node.js, Express.js, MongoDB
- Developed student workbooks with CI integration for linting
- Built reporting infrastructure that combined data from multiple sources: Payments, CRM, LMS, etc.
- Implemented automation for web hooks, status checks, user events, reports, deployments, tests, etc.
- Implementing/analyzing tracking services such as Google Analytics/Tag Manager, Facebook Pixel, click heatmaps, etc
- Search Engine Optimization

SkillsEngine — *Senior Software Engineer*

Oct 2017 - Mar 2019

https://skillsengine.com

Develop web service around skill predicting and aligning machine-learning driven service.

- Work with modern web stack: React + Redux, Ember, Ruby on Rails
- Agile environment and collaborative coding
- Full Stack development, worked on all corners of the code base, services, and integrations

Anaconda — *Software Engineer*

JUNE 2015 - JAN 2017

https://anaconda.com

Bokeh contributor, an open-source python driven graph generator. Implemented and designed client-specific projects and solutions.

- Worked on *https://anaconda.org*, a packaging and environment manager repository
- Contributed to open-source packages such as Bokeh *https://bokeh.pydata.org*
- Contributed to *https://www.ospc.org/taxbrain/*
- Fast-paced full-stack client-specific projects with modern web development stacks
- Introduced and implemented Continuous Integration practices
- Tools worked with: Django/Django Rest Framework, Flask, Backbone.js, Bokeh, iPython Notebooks

- Install and maintain SQL reports and data visualizations
- Monitor KPIs and IT budgets to assess technological performance

Support Operations

- Install customer support pipelines
- Document and train support staff
- Provide tools needed to support customer troubleshooting

Technology Vendor Relations

- Research vendor products that align with business needs
- Learn product and read documentation
- Train internal staff if needed
- Interface with vendor support if needed
- Negotiate cost of vendor services if possible

Qualifications

- Proven experience as a CTO
- 8 years working in a technological role
- 5 years of engineering managerial experience
- Advanced technological skill set and a demonstrated history with technology
- Board presentations
- Knowledge of technological trends to build strategy
- Understanding of budgets and business-planning
- Ability to conduct technological analyses and research
- Excellent communication skills
- Exceptional team management skills
- Excellent verbal and written communication
- Leadership and organizational abilities
- Strategic thinking
- Problem-solving aptitude
- Ability to delegate efficiently
- Extensive industry knowledge with an eye towards the future

Generation Ready — *Lead Software Engineer + Architect*

NOV 2013 - JUNE 2015

https://generationready.com

Designed, built, and maintained in-house internet software. Headed small team of web developers and quality assurance technicians.

- Flourished in a fast-paced, agile environment
- Developed deep PHP and Javascript skills
- Tools worked with: Laravel, Backbone.js, MySQL, AWS

CLIENTS AND PROJECTS

CMAsnap — *Partner + Fractional CTO*

https://cmasnap.com

Developed and launched CMA software for realtors

- Built application from the ground up
- Integrated into CRM to track sales, support, and marketing
- Maintain Business Intelligence platform to monitor KPIs
- Agile development environment
- Enforce cybersecurity policies
- Research and implement third party software
- Hire and train new technology staff when needed
- Marketing tech, sales ops, and web development

OliveUs — *Fractional CTO*

https://oliveusapp.com

Premium Sitter Matching App

- Built initial mobile app (NannyTribe)
  - *https://drive.google.com/file/d/1p-dIehxvL_uQCQ7Szq5K3drf4xr-2fH8*
  - React Native + Node.js/Express.js + Postgres
  - Beta release on TestFlight
  - Custom built matching algorithm
- Project manage outsourced development team
- Integrated app into CRM
- Build data pipelines and BI dashboards

AdFree.Life — *Ad Blocking as a Service*

https://web.archive.org/web/20181128042929/https://www.adfree.life/

- Sets up a pre-configured Pi-Hole on a dedicated VPS
- Uses cron jobs to generate daily trials
- Hit #11 on Hacker News! (*https://news.ycombinator.com/item?id=14910683*)
- Built with Express.js, Node.js, MongoDB, DigitalOcean API

AWARDS AND CERTIFICATES

Math K-12 Texas Educator, Texas

Eta Phi Lambda Honors, Lamar University

Eagle Scout, Boy Scouts of America

EDUCATION

App Academy, San Francisco, CA — *Web Development*

JULY 2013 - OCT 2013

Lamar University, Beaumont, TX — *B.S. Communications, Cum Laude*

AUG 2005 - DEC 2009

OPEN SOURCE

YoSQL — *NoSQL/JSON to SQL converter*
https://github.com/kevincolten/yosql

Converts NoSQL databases and JSON into relational databases

Campus Manager — *Learning Management System*

https://github.com/AustinCodingAcademy/campus-manager

- Handles grades, attendance, screencasts, registration, payments, etc
- Over 1000 Users
- Supports webhooks with Zapier
- Powerful reporting engine
- Built with MongoDB, Node.js, Express.js, Passport.js, Backbone.js, and React.js
